1953 PLANS FOR DEVELOPMENT OF ELECTRON TUBES (6 pp; German; [REDACTED]
[REDACTED]

25X1A Comment: Previous reports have mentioned certain projects as having been already completed, which are listed in this report as being on the 1953 development program, such as 6AG5 tubes and 6AL5 tubes. 25X1A

This document is a typewritten report which summarizes the 1953 plans for the development of electron tubes in the GDR. The report is divided into five main sections, as follows: 1) 1953 prospective plan for development projects at the ZLE (Central Laboratory for Radio-telegraphic [REDACTED]) in Erfurt; some of the tubes listed are battery tubes for microphone amplifiers, various types of transmitter tubes, and velocity-modulated tubes; 2) 1953 prospective plan for development projects at the HF (High-Frequency) Plant in Berlin-Oberschoeneweide; some of the tubes listed are miniature tubes for television purposes, double-triode tubes AT 7, and line-sweep tubes BL 81; 3) 1953 plans for experimental work in connection with technological projects at ZLE in Erfurt; 4) 1953 plans for experimental work in connection with technological projects at HF; 5) general comments.
